

Security & Privacy Impact Assessments

X4 Service Offering:

Why:

To answer the question: “Do we know what data assets we have and are we managing them effectively?”

For a business seeking a strategic advantage through technology, it is imperative that they are aware of what these changes might mean for their information security and data privacy. An impact assessment will give you clarity to make informed decisions with confidence and achieve rapid growth through secure innovation.

Deliverables:

- Security Risk Assessments (incl. Cloud).
- Privacy Impact Assessments.
- Clarity around risks from custom built & 3rd party software solutions.
- The know-how to address those risks and be secure in your IT Practice.

What's involved:

- We engaged with you and your employees to understand your business operations and data usage.
- We assess the information gathered and build a picture of your current security maturity level
- Any risks we identify will be captured and solutions will be proposed.

Result:

- You will have a clear understanding of the security and privacy risks to your organisation with recommendations for remediating these issues.
