

Information Services Strategic Plan

X4 Service Offering:

Why:

To answer the question: “Does our IT strategy support and enable our business strategy?”

Having technology aligned to and supporting your business, can turbo charge your ability to deliver against your business strategy and KPIs

What's involved:

- We will work with you to understand your business objectives
- We will work with key members of your team to understand what they need, their current pain points, strategic goals that can't be fully realised due to internal constraints and how technology can empower their teams.
- We will then review your current IS landscape and assess how well it helps you achieve those objectives

Result:

- We will develop a future state view of your IS landscape that better supports your business objectives and provide a clear actionable plan which shows you how to get there.

Deliverables:

- A view on how your IT systems and solutions support your business aims.
- An assessment of where the gaps and opportunities lay.
- Clear programme plan and project briefs to improve your IT/business alignment
- Presentation of findings and recommendations to your Executive Team
